Lab 6: Set Up Nexus Repository and Configure User Access

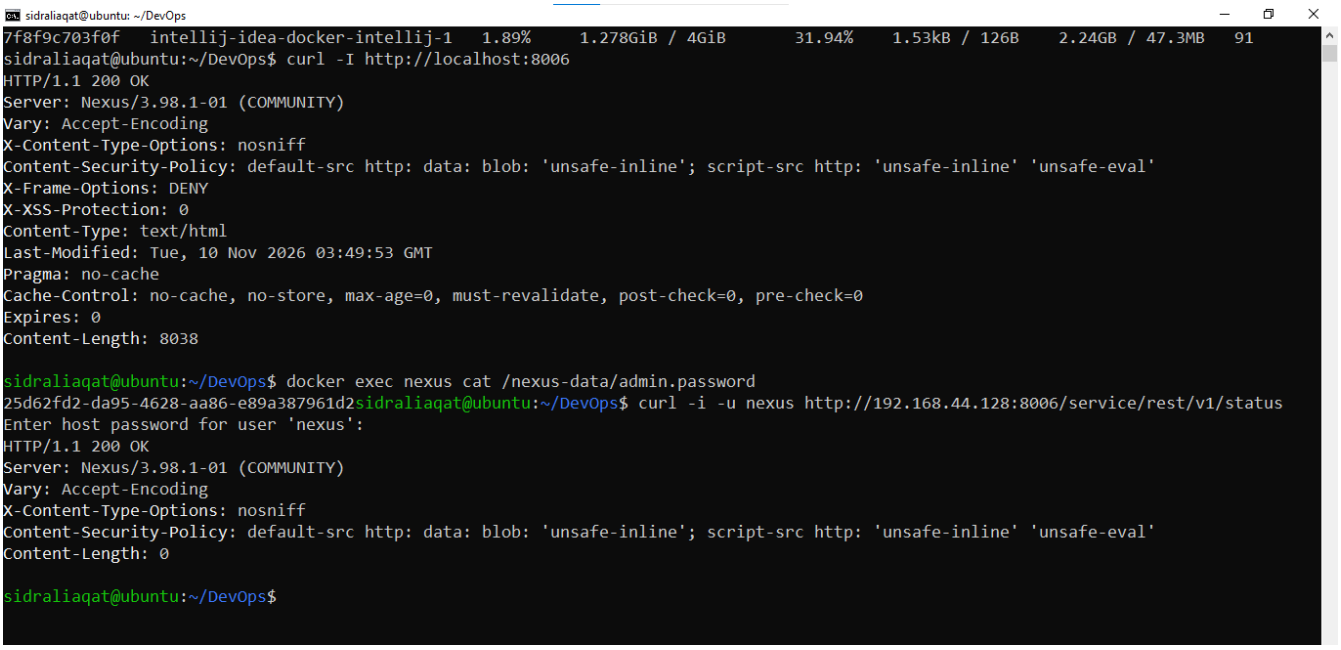

Name	Sidra Liaqat
Reg no	2023-BCS-083
Class	BCS-7A
GitHub username	sidraliaqat
Course	DevOps (DevOps_F26)

Task 1: Run Nexus Repository

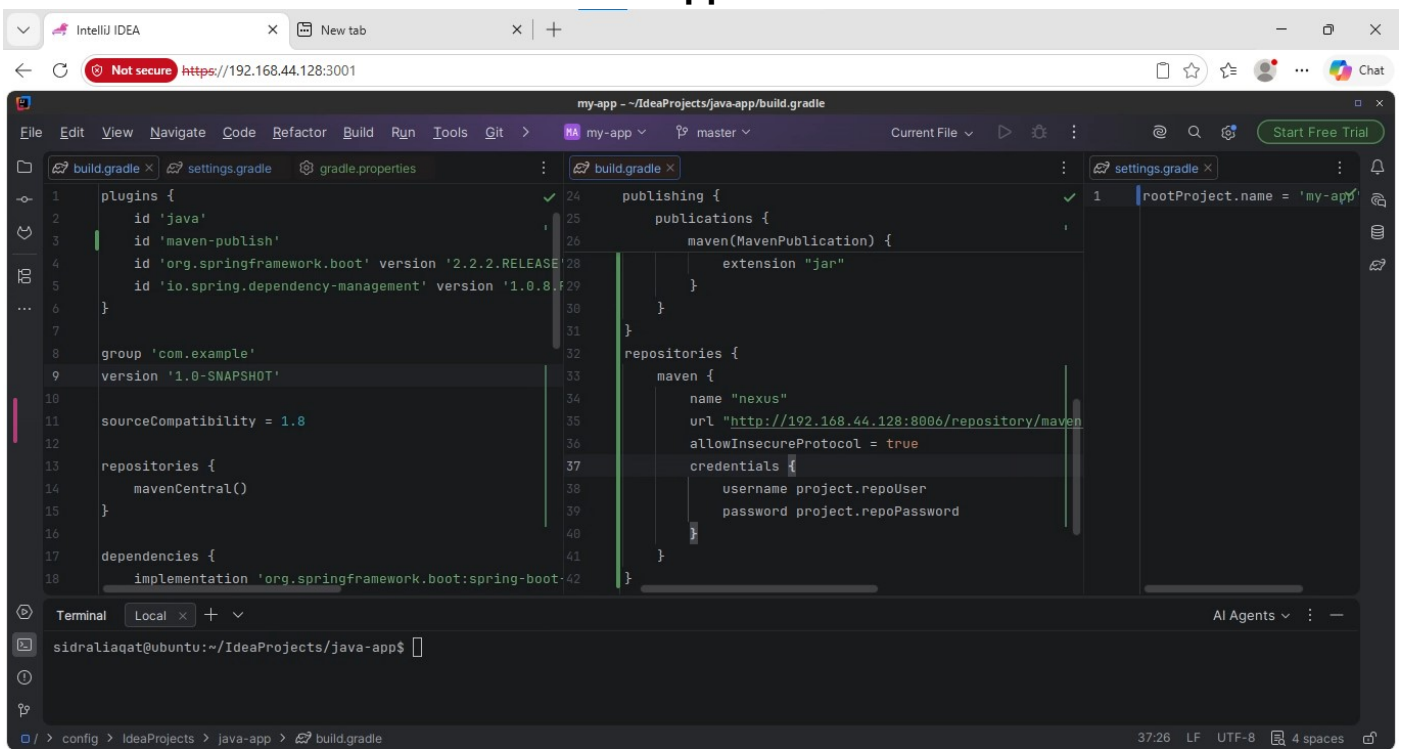

nexus_container_running.png
Nexus container running in Docker with ports 8006 and 8007 published.

Task 2: Create a Role and User and Verify Access

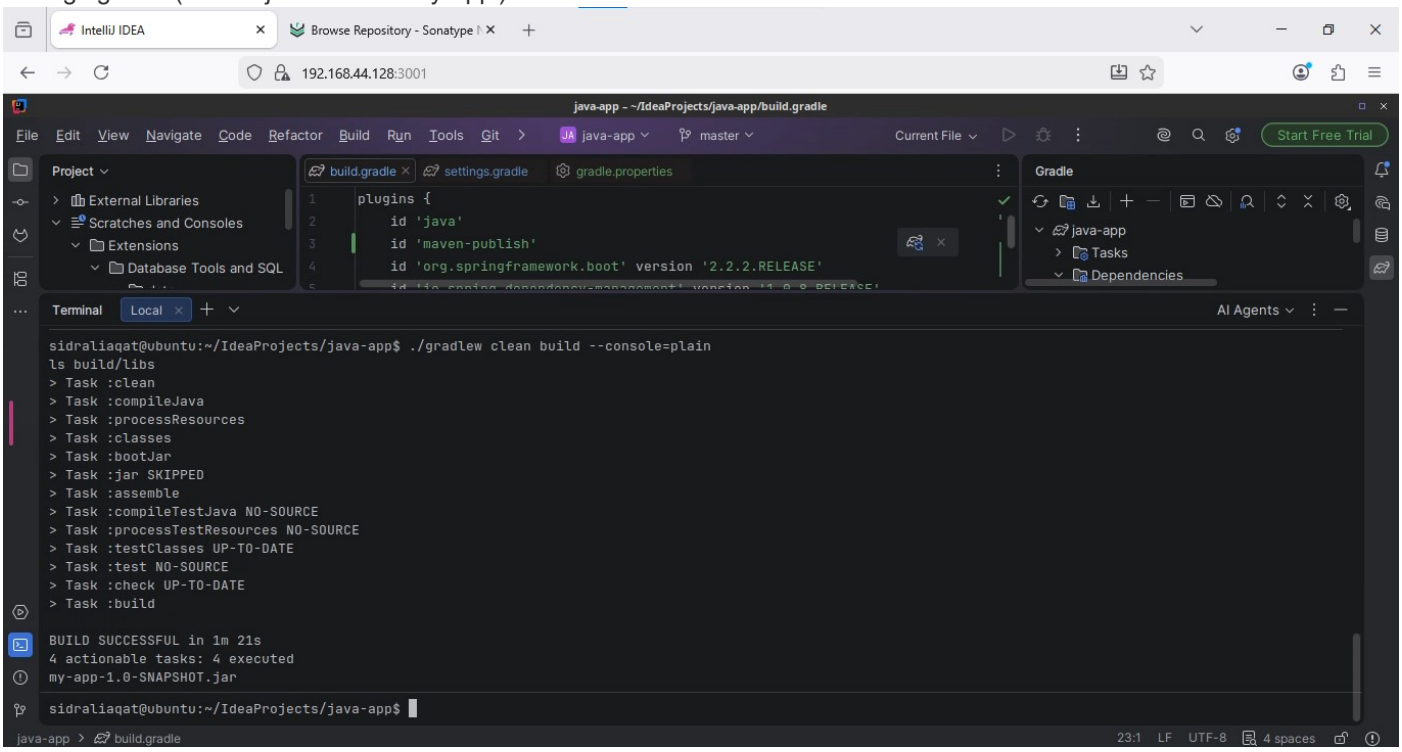

nexus_user_access.png
Status API request as the nexus user returns HTTP/1.1 200 OK.

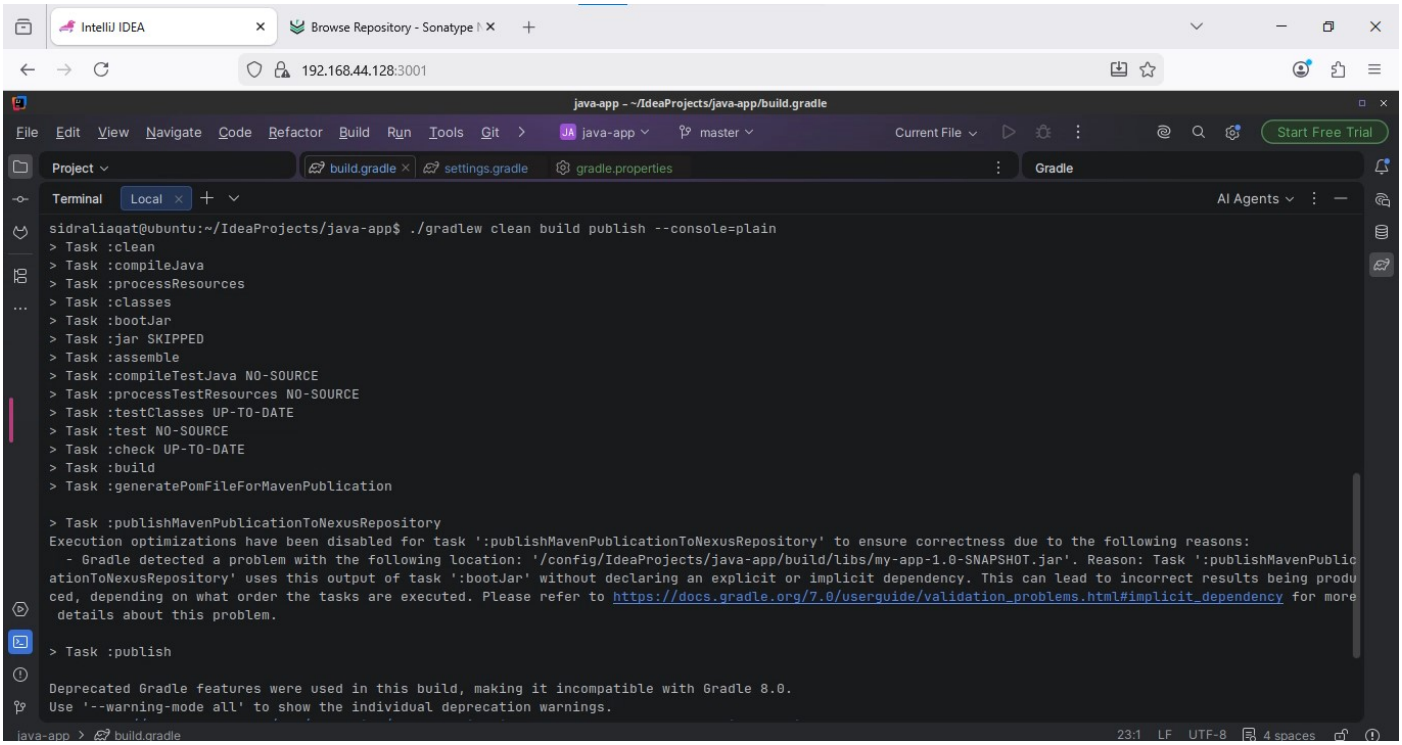

Task 3: Build and Publish the Gradle Application

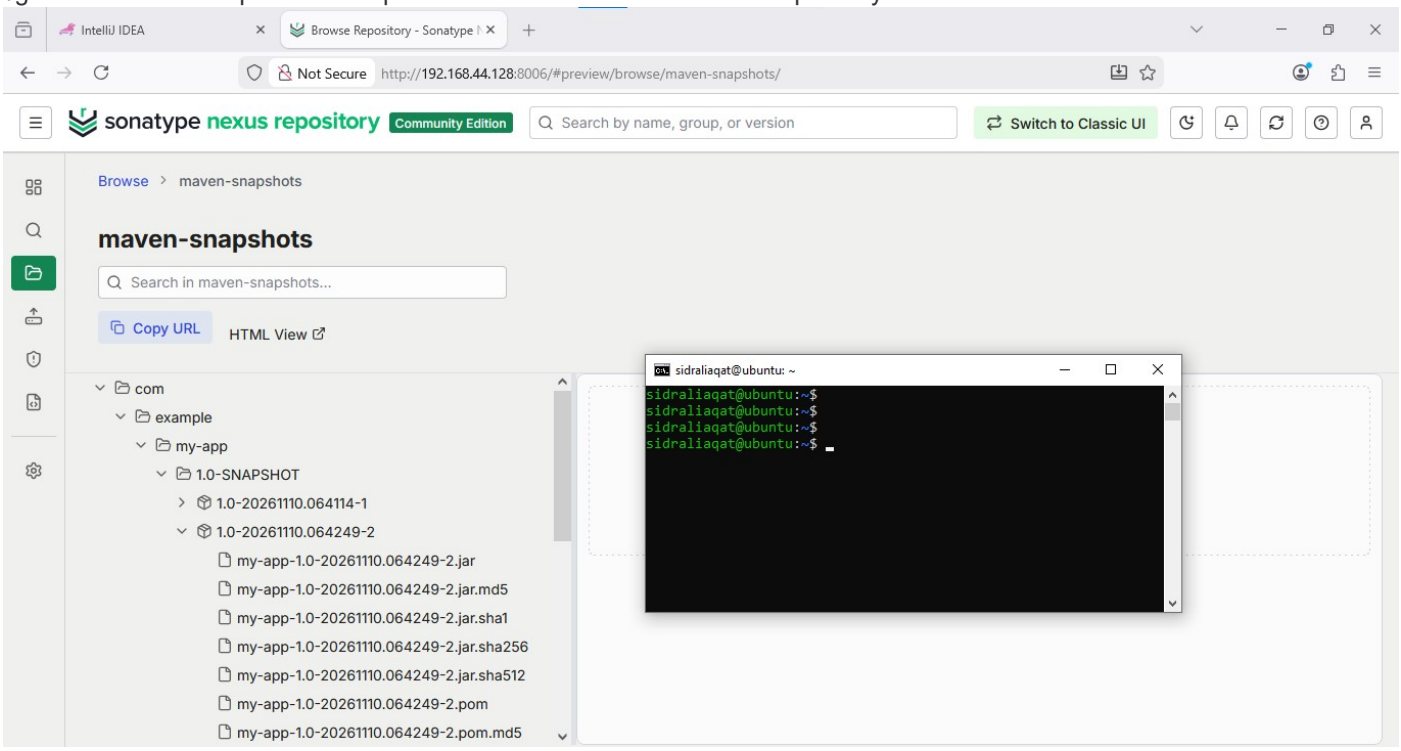

gradle_nexus_configuration.png build.gradle publishing configuration and settings.gradle (rootProject.name = 'my-app').

gradle_nexus_build.png
./gradlew clean build succeeds and creates my-app-1.0-SNAPSHOT.jar.

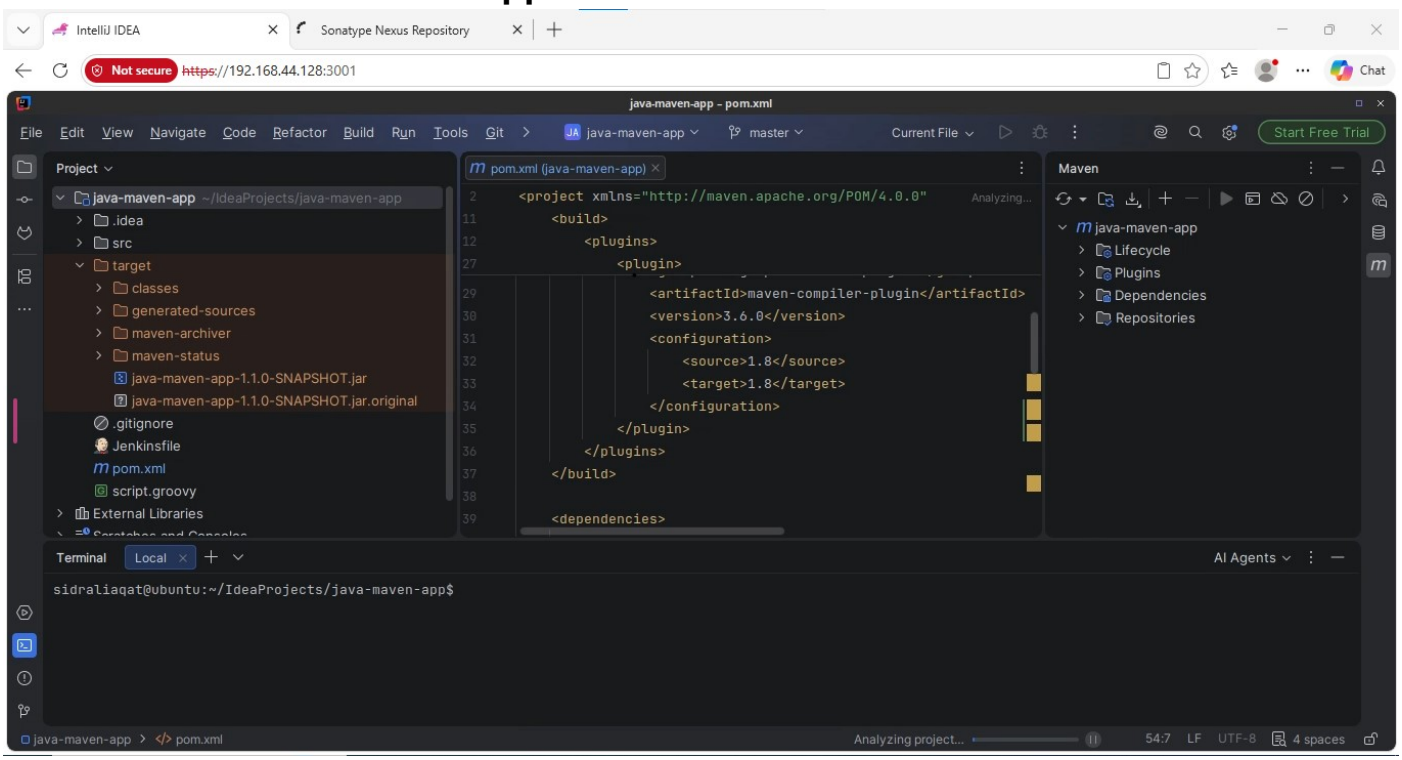

gradle_nexus_publish.png
./gradlew clean build publish runs publishMavenPublicationToNexusRepository.

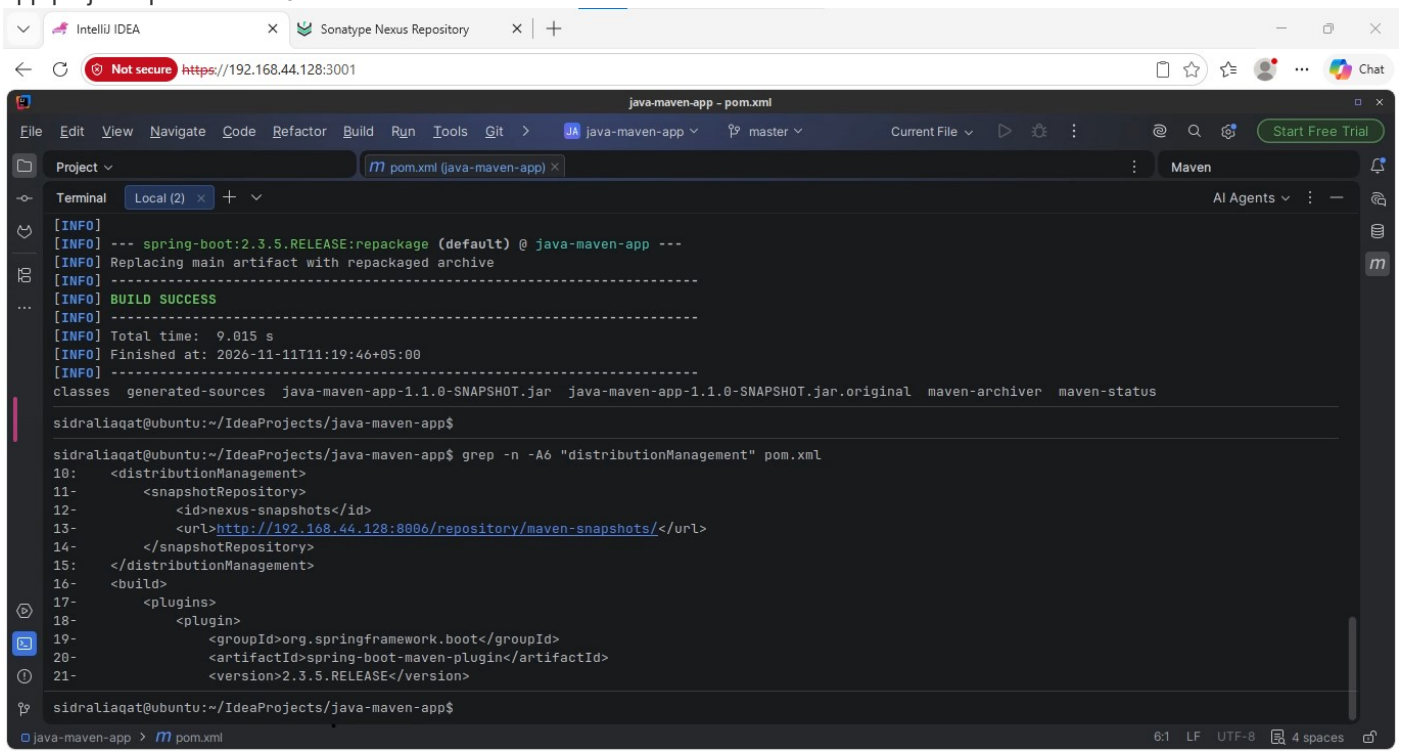

nexus_gradle_artifact.png
Published my-app snapshot and Maven metadata under com/example/my-app/1.0-SNAPSHOT.

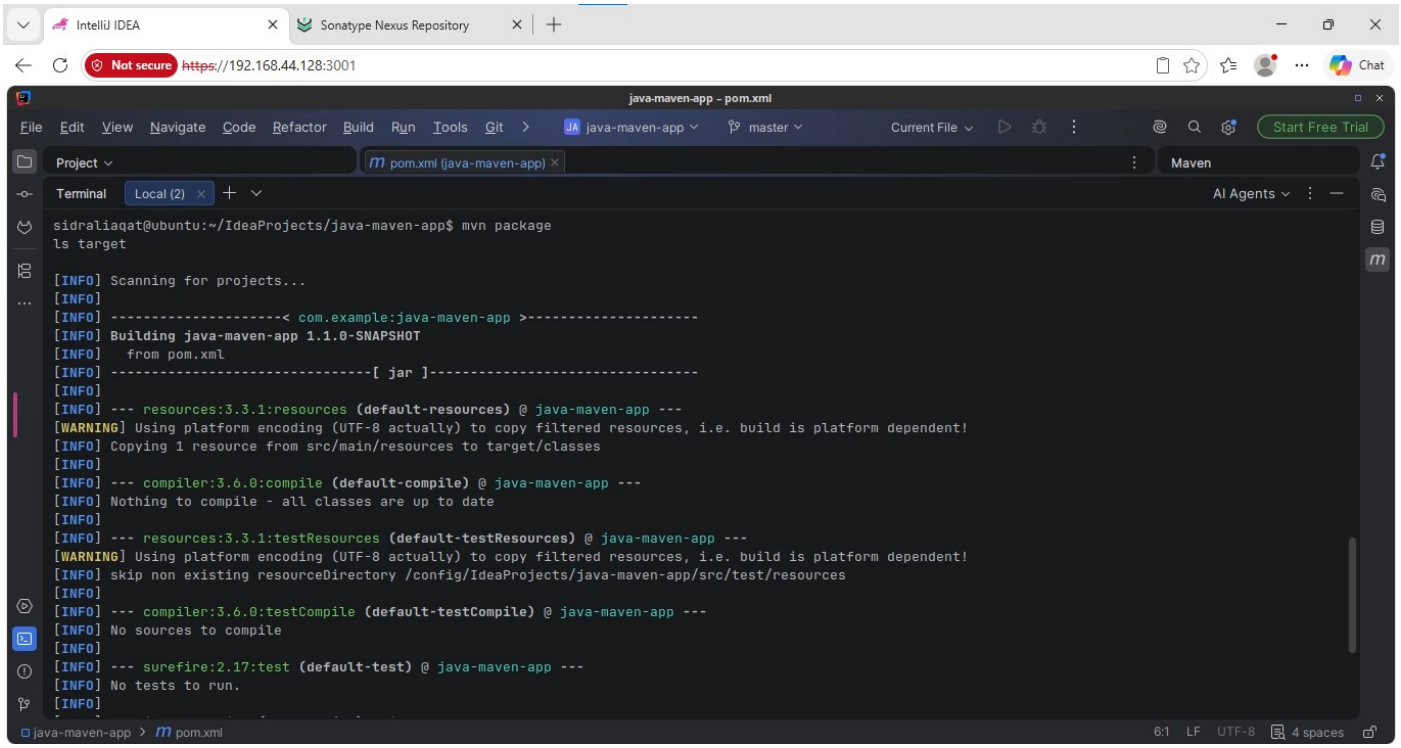

Task 4: Publish the Maven Application

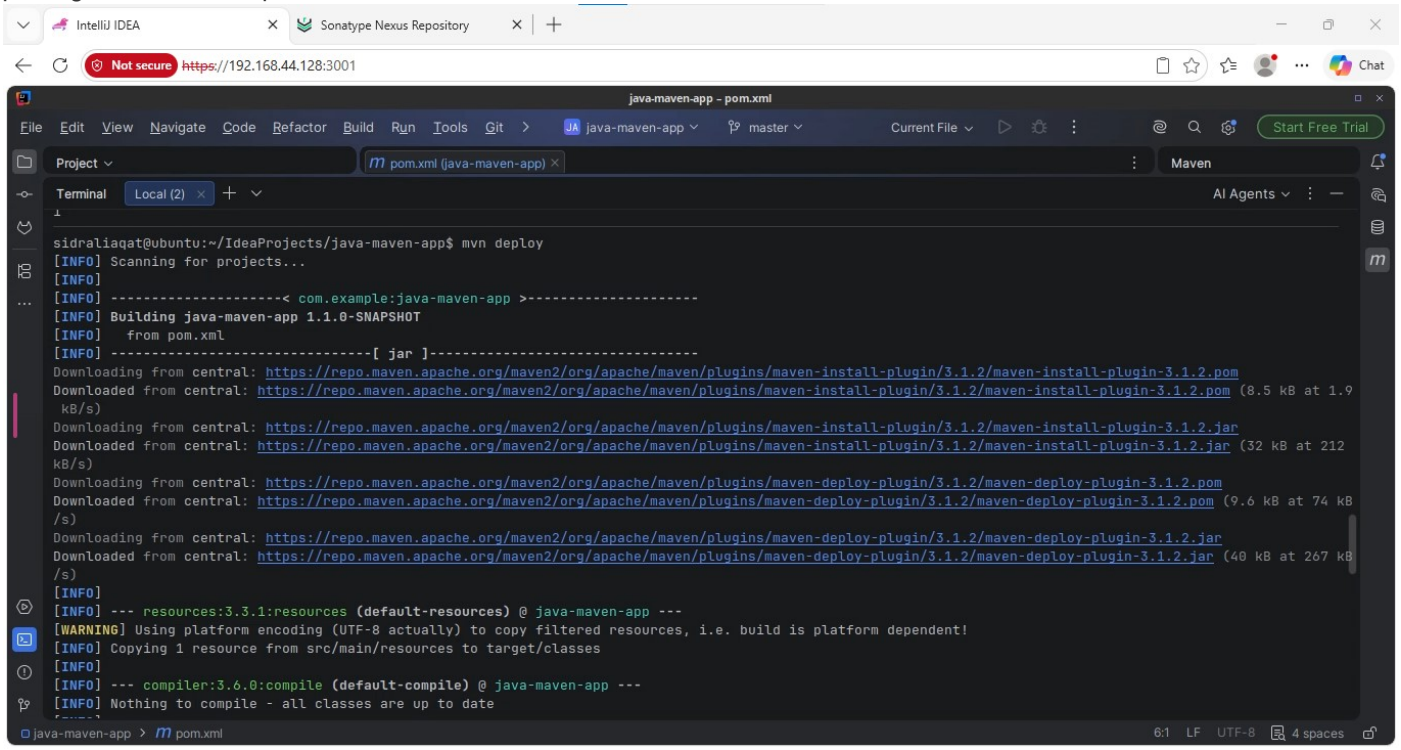

maven_nexus_project.png java-maven-app project open in IntelliJ.

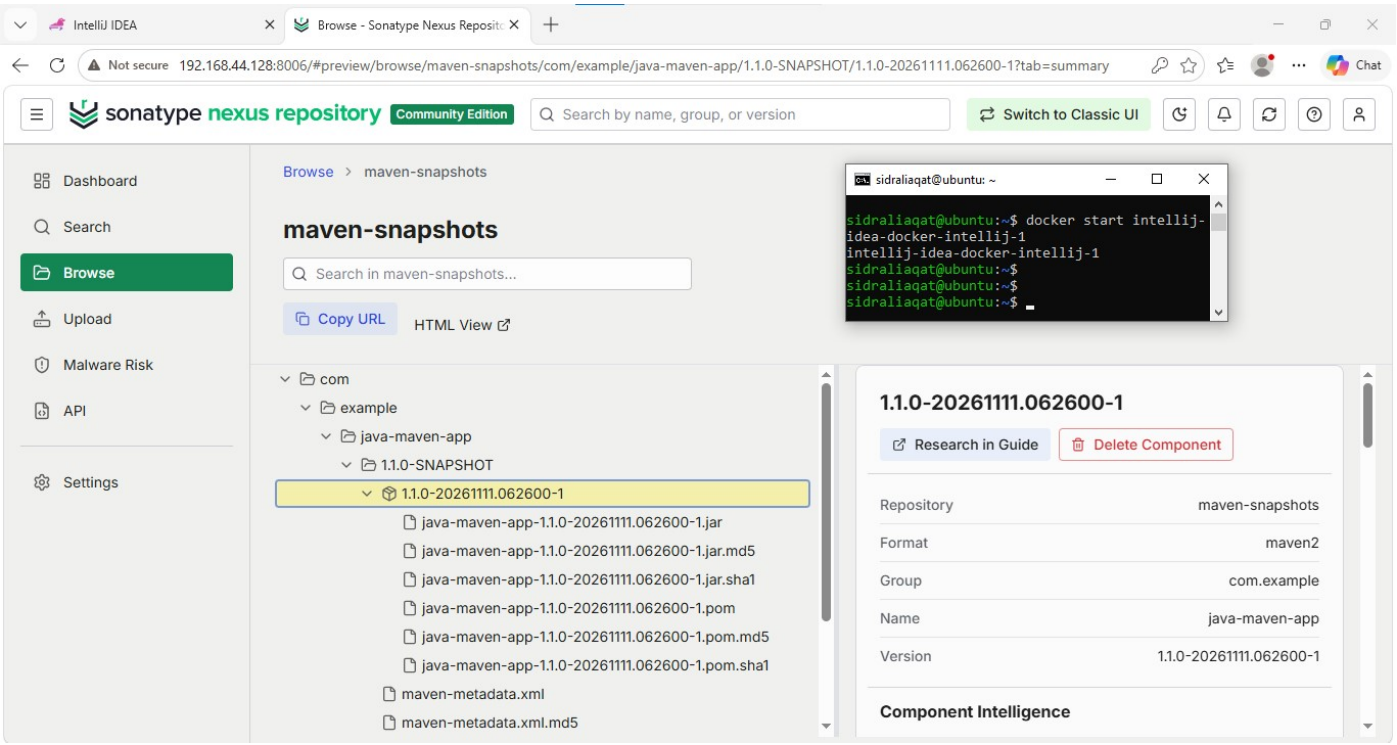

maven_distribution_management.png distributionManagement block with the nexus-snapshots repository in pom.xml.

maven_package_nexus.png mvn package builds the snapshot JAR.

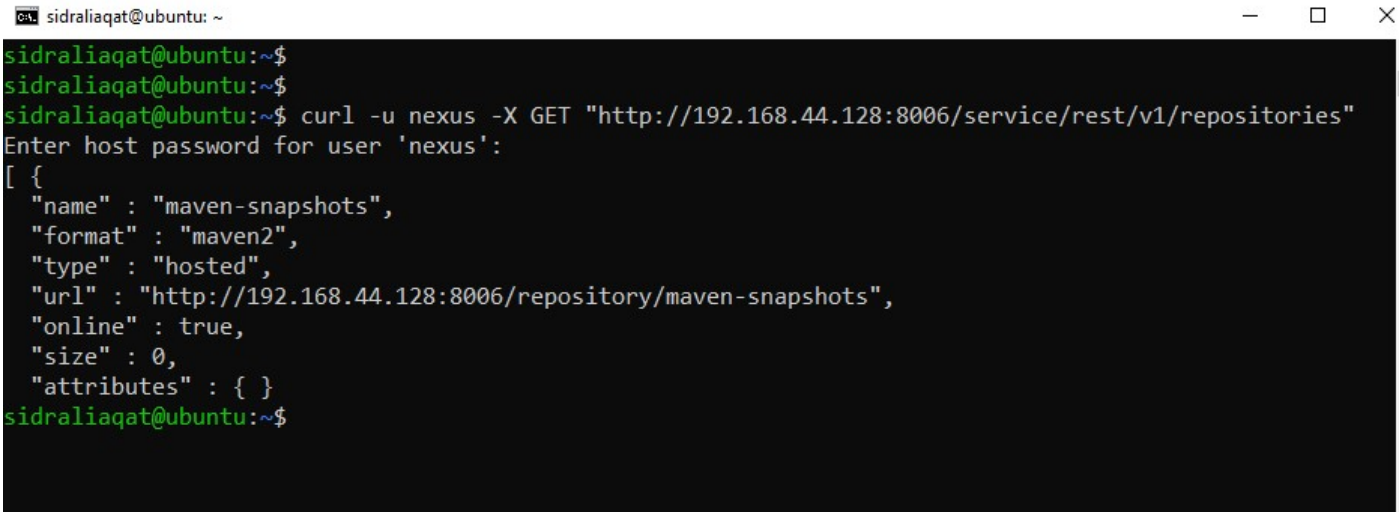

maven_deploy_nexus.png mvn deploy uploads the snapshot to Nexus.

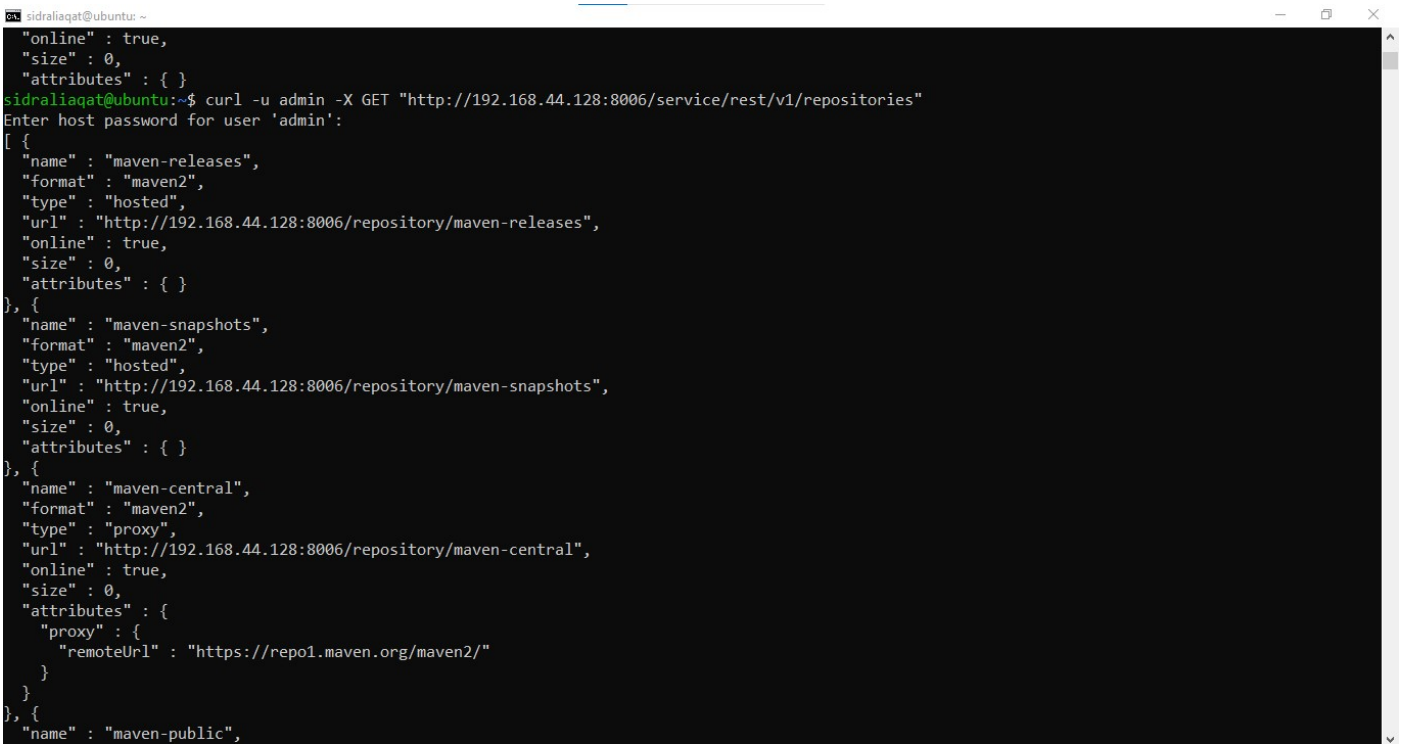

nexus_maven_artifact.png java-maven-app 1.1.0-SNAPSHOT with JAR, POM and metadata in Nexus.

Task 5: Inspect Nexus Using the REST API

nexus_repositories_user.png
Repository list returned for the restricted nexus user (maven-snapshots only).

nexus_repositories_admin.png
Repository list returned for the admin user.

nexus_components_list.png
Components in maven-snapshots, showing id, repository, name and version.

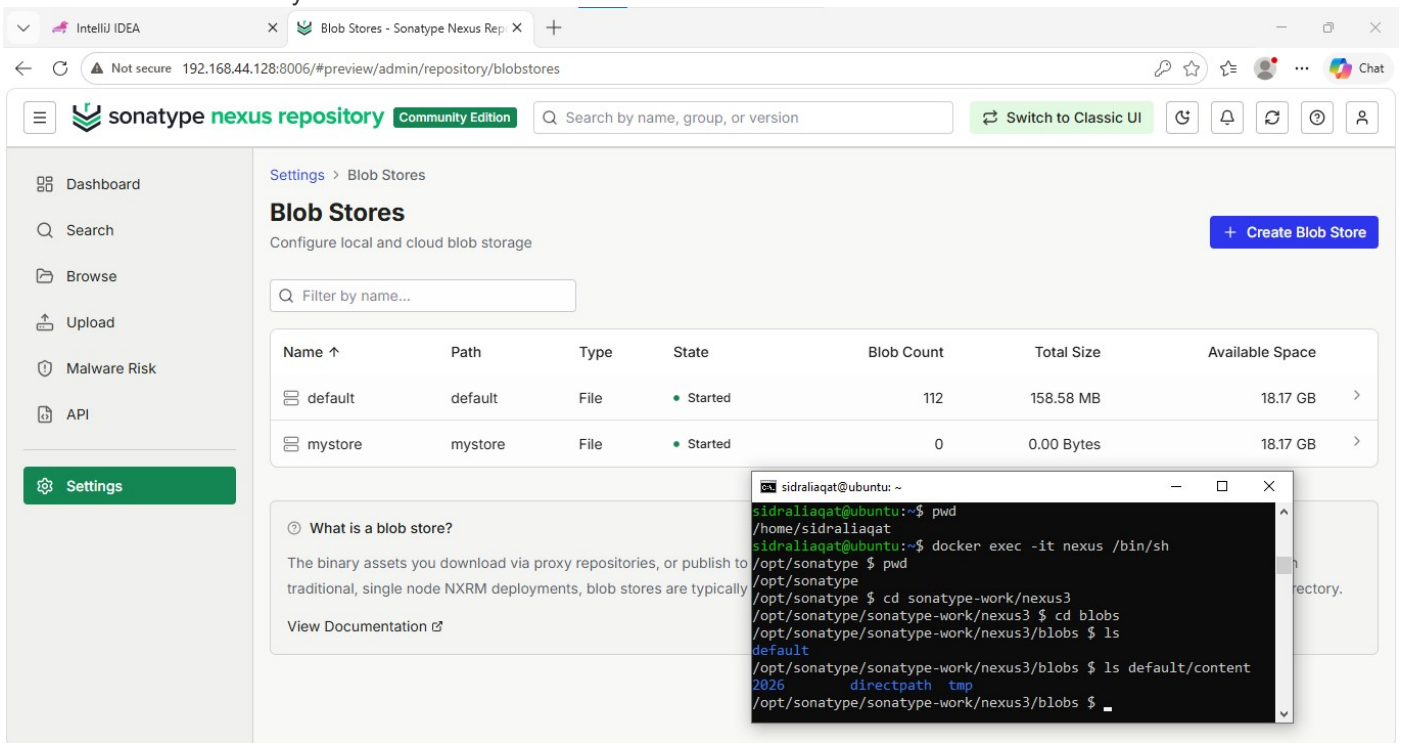

nexus_component_details.png
One component fetched by its id.

Task 6: Blob Store and Docker Hosted Repository

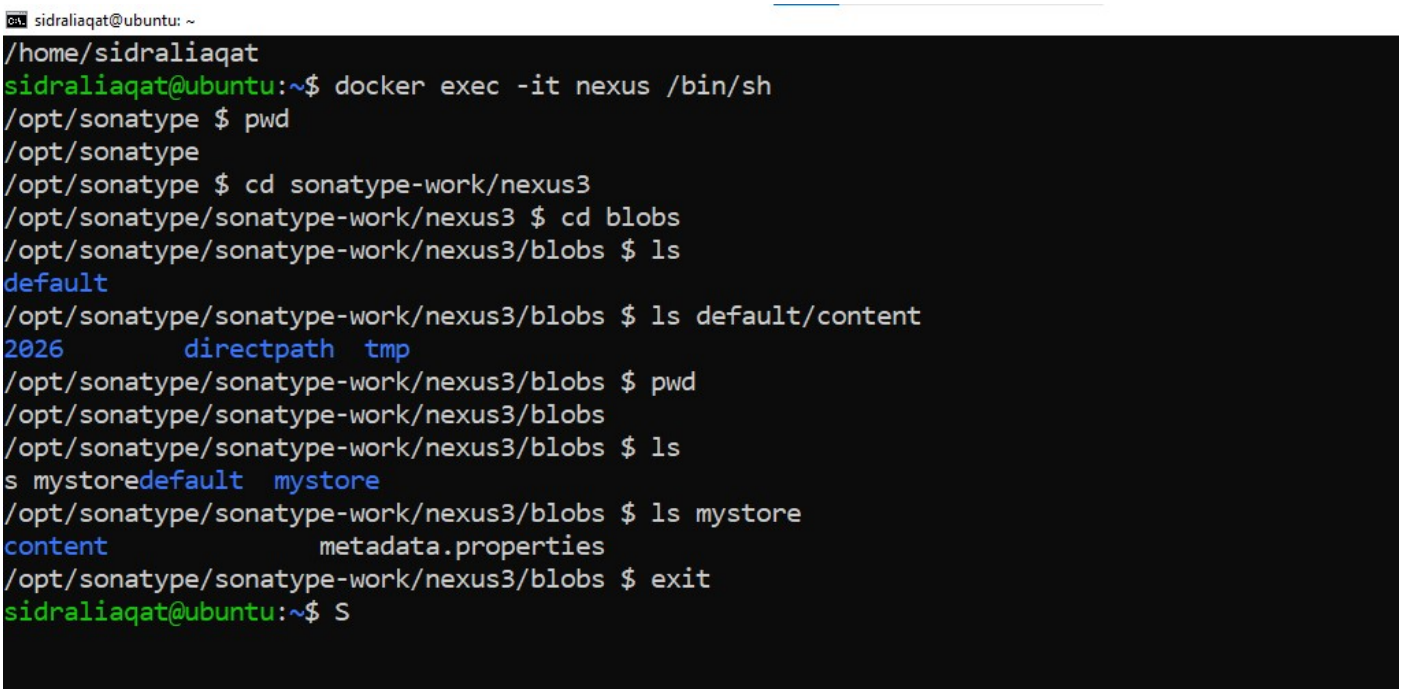

nexus_default_blob
_content.png

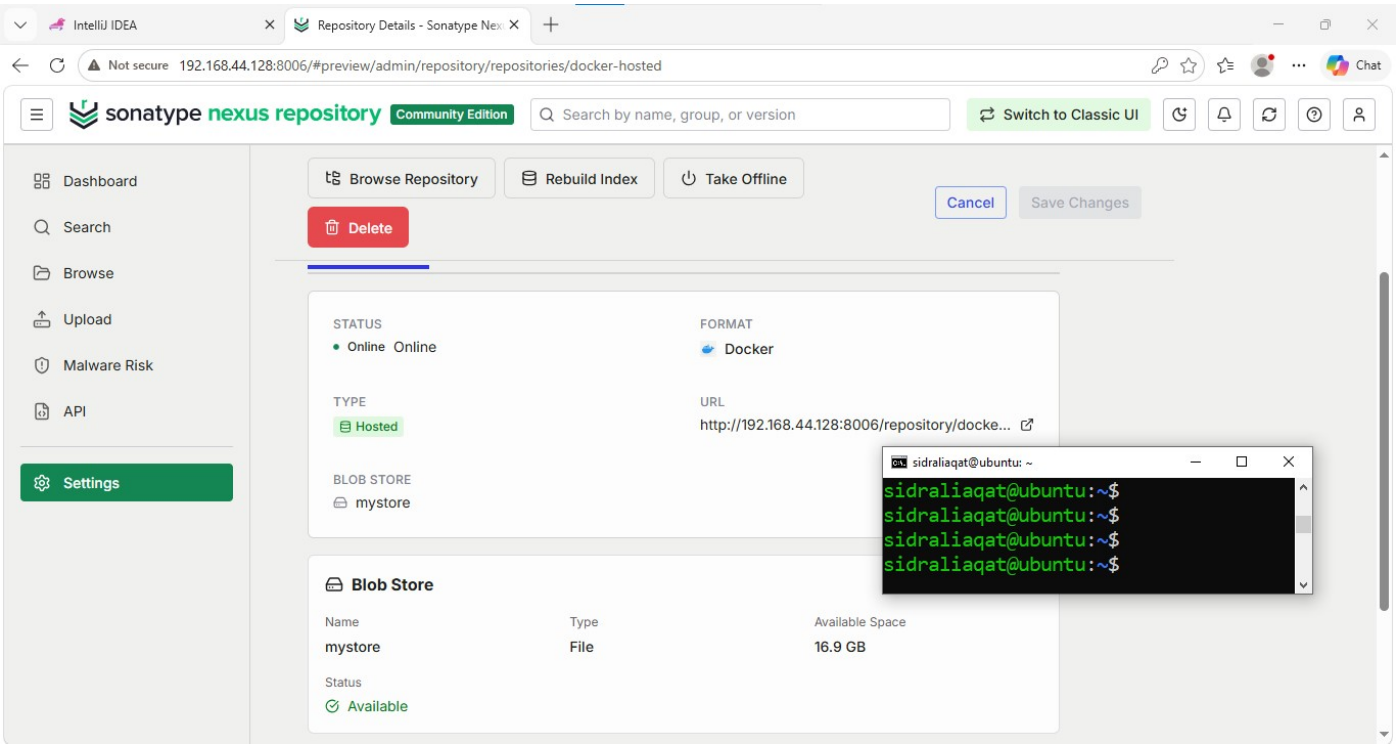

nexus_default_blob_content.png
Default blob store directory inside the Nexus container.

nexus_mystore_created.png default and
mystore file blob stores, both Started.

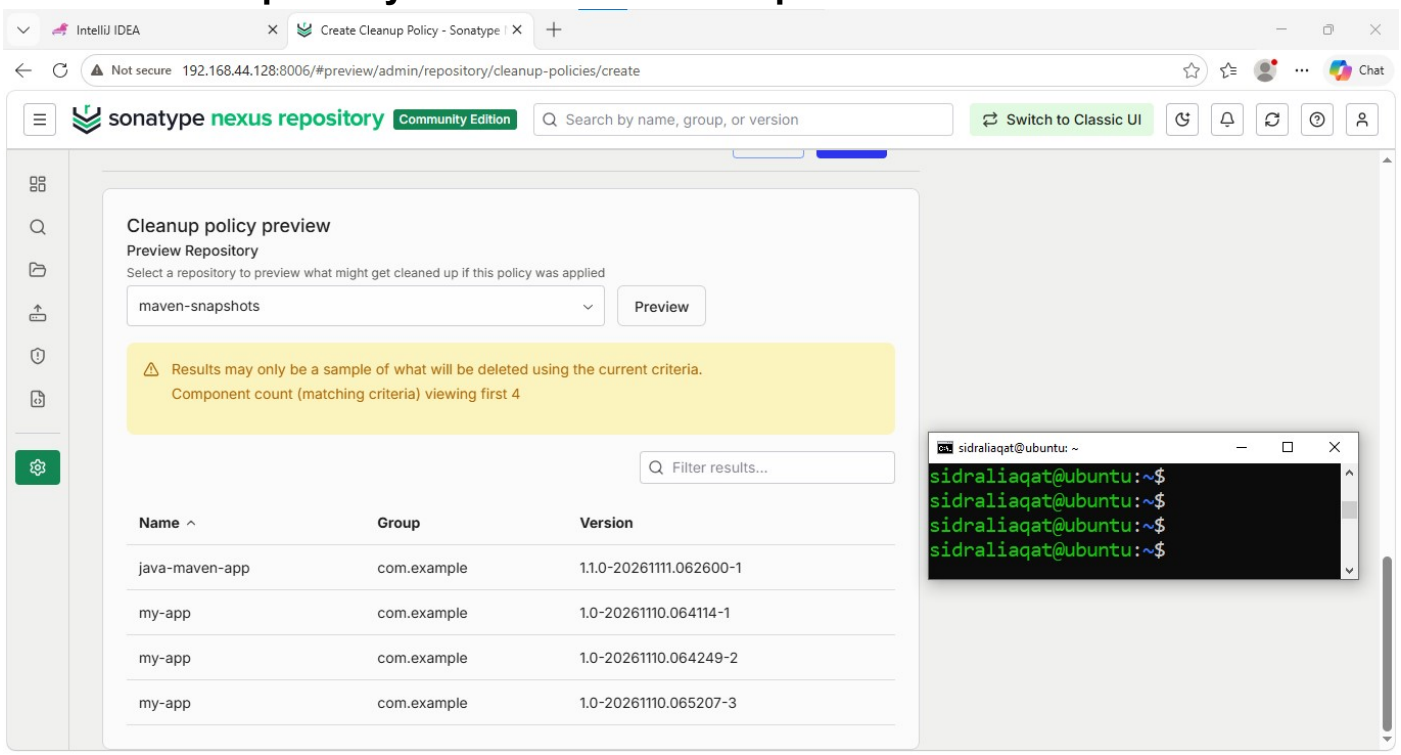

nexus_blob_directories.png default and mystore directories inside the container shell.

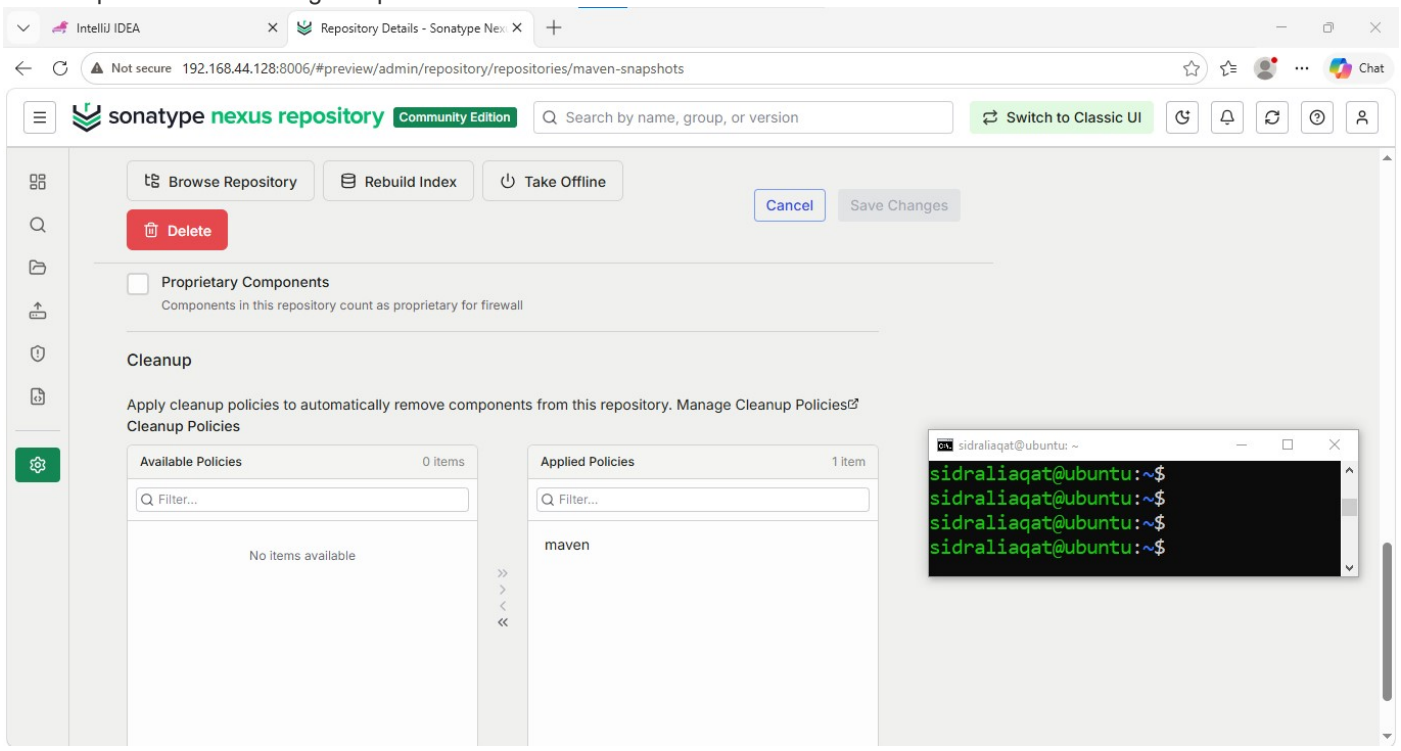

nexus_docker_hosted_repository.png docker-hosted repository using mystore on HTTP connector 8007.

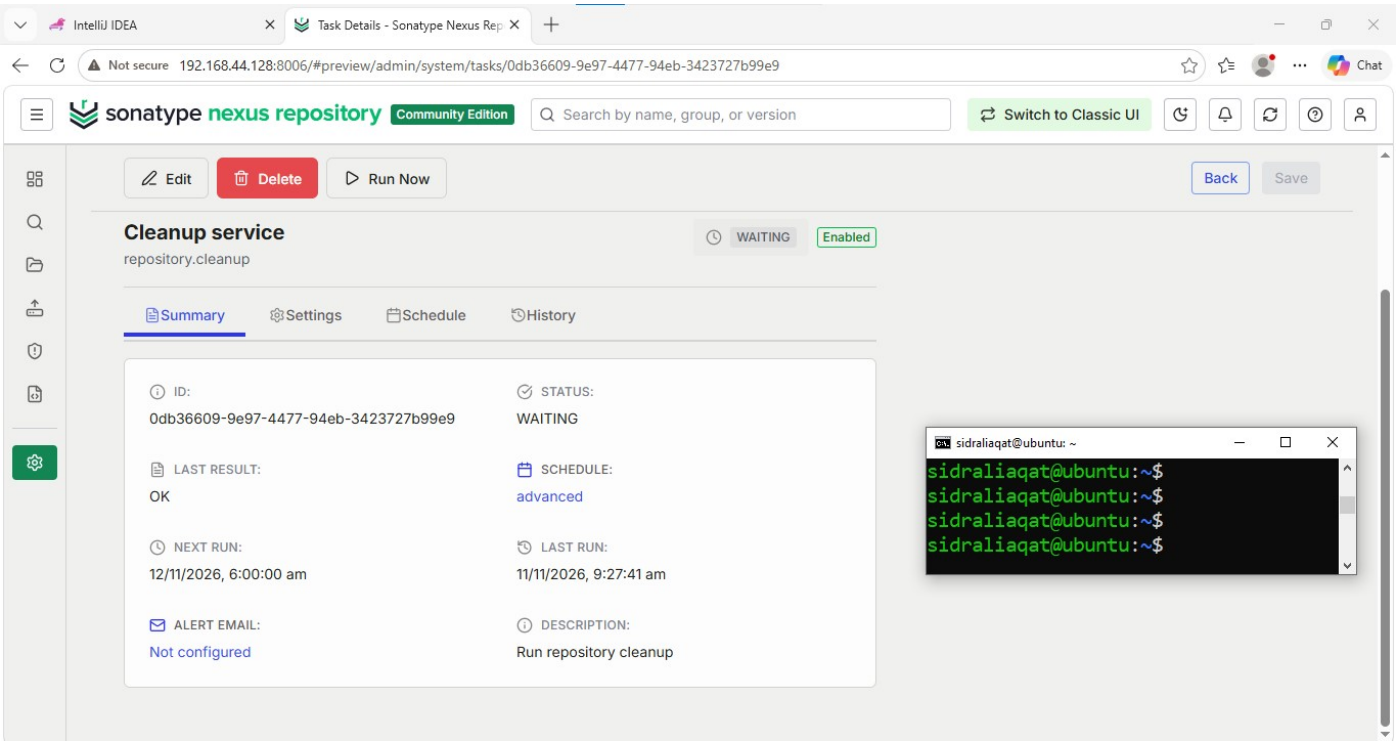

Task 7: Cleanup Policy and Blob Store Compaction

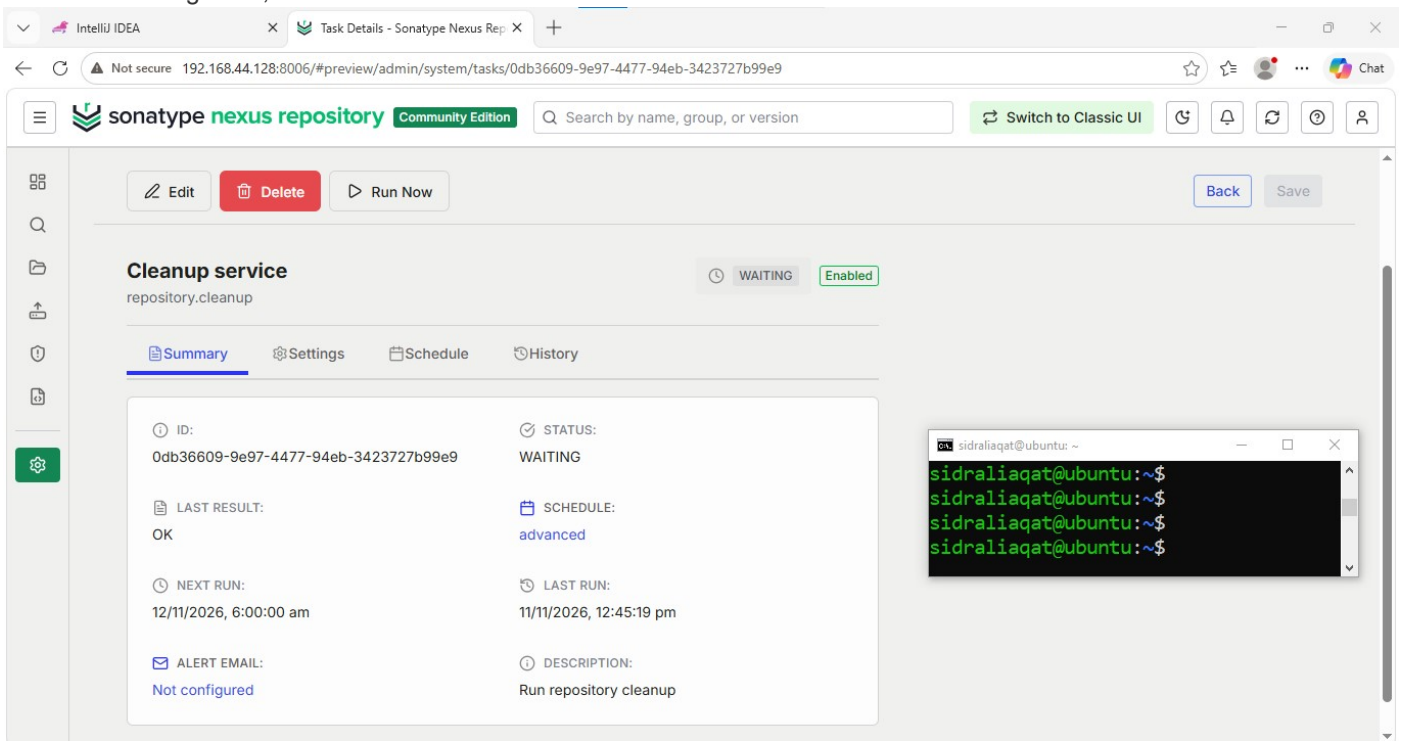

nexus_cleanup_policy_created.png maven cleanup policy (maven2, snapshots, .*) with the preview of matching components.

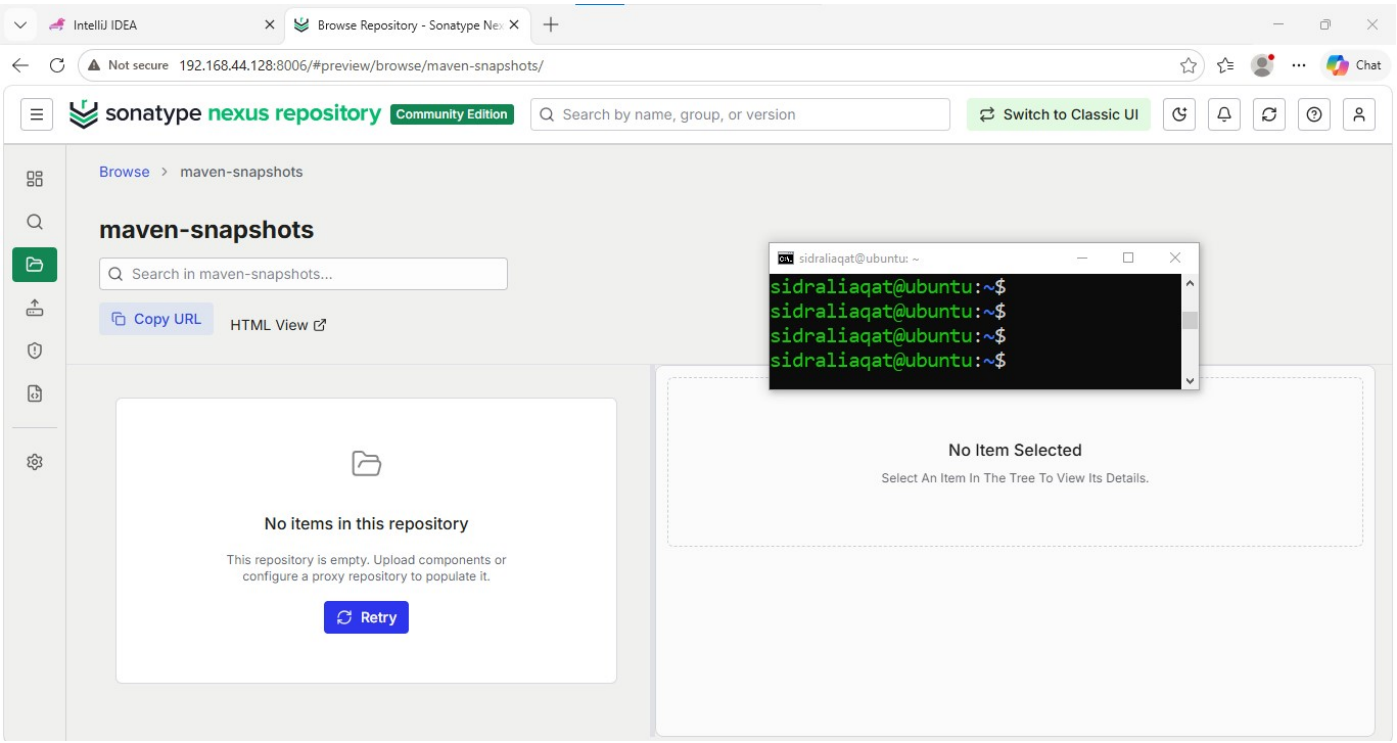

nexus_cleanup_policy_attached.png
maven policy applied to maven-snapshots.

nexus_cleanup_task_waiting.png Cleanup service in Waiting state, next run at 06:00.

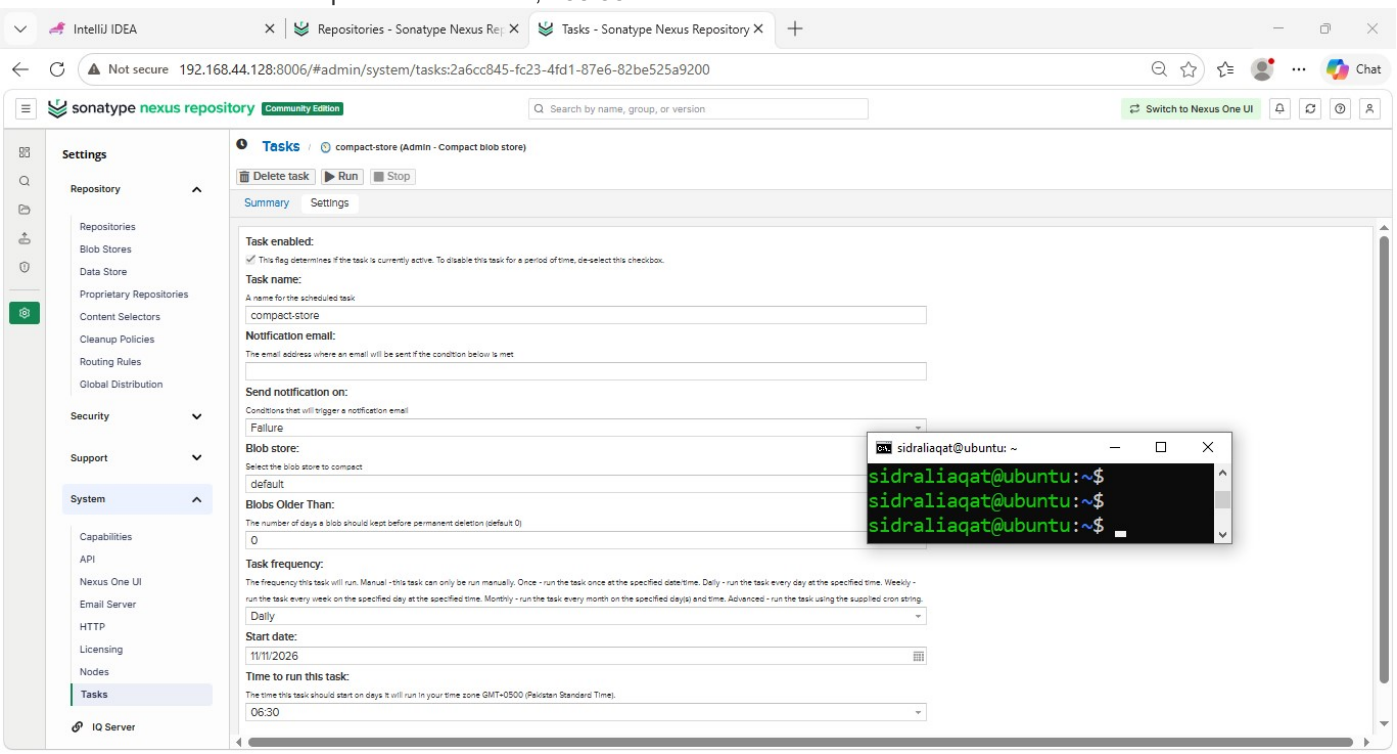

nexus_cleanup_task_completed.png
Cleanup service after the manual run, Last result Ok.

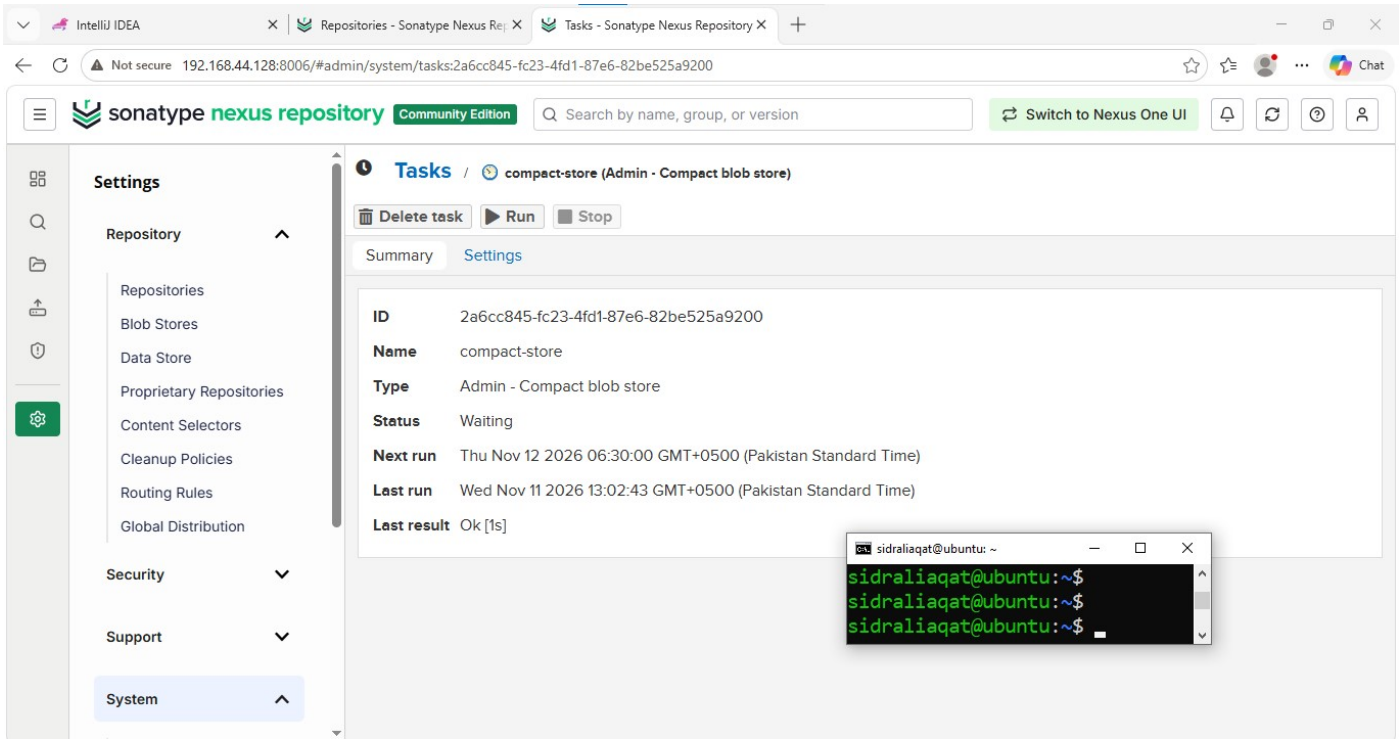

nexus_maven_snapshots_empty.png maven-snapshots is empty after cleanup.

Screenshot pending: nexus_blob_store_before_compaction.png

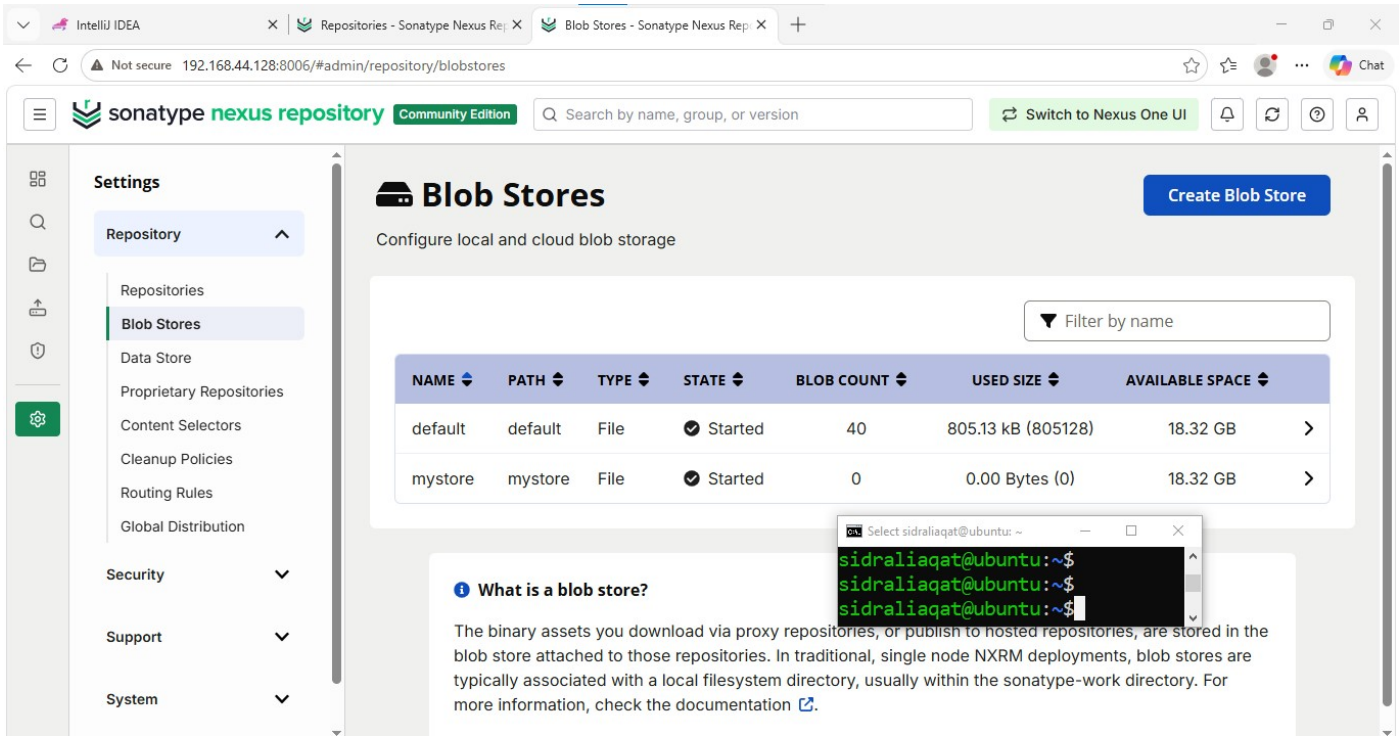

nexus_blob_store_before_compaction.png
Default blob store before compaction: 112 blobs, 158.58 MB.

nexus_compact_task_configured.png compact-store task: default blob store, 0 days, daily at 06:30.

nexus_compact_task_completed.png compact-store after the manual run, Last result Ok.

nexus_blob_store_after_compaction.png Default blob store after compaction: 40 blobs, 805.13 kB.
